

Interoperability software

Deliverable Number: D4.4

Date 31.10.2026 | Final Version

Contributors: Rik Kreeftenberg, Nicolas Payette, Jeroen Steenbeek

Visibility: Public

Funded by the European Union

Funded by the European Union under the Horizon Europe Program, Grant Agreement No. 101157456 (SURIMI). Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or the European Climate, Infrastructure and Environment Executive Agency (CINEA). Neither the European Union nor the granting authority can be held responsible for them.

UK Research and Innovation

UK participants in SURIMI are funded by the UK Research and Innovation (UKRI) under the UK government's Horizon Europe funding Guarantee [grant number 10132993].

DOCUMENT INFORMATION

Grant Agreement	101157456
Project Acronym	SURIMI
Project Title	Integration of innovative and reliable socio-ecological models and user-driven solutions into the Digital Twin Ocean, to facilitate what-if scenarios and decision support, under a co-creation approach.
Deliverable Number	D4.4
Work Package Number	WP4
Deliverable Title	Software enforcing interoperability protocol, scheduling and ensuring consistent flows between SURIMI models
Lead Partner	EII
Author(s)	Rik Kreeftenberg, Nicolas Payette, Jeroen Steenbeek
Due Date	31 October 2026
Submission Date	31 October 2026
Dissemination Level	Public
Type of Deliverable	Other

Version	Summary of Changes
Final Version	Final Version

SUMMARY

This deliverable presents the SURIMI Interoperability software that schedules and ensures consistent flows between the coupled SURIMI models. The Interoperability software is the computational implementation of the detailed descriptions of the SURIMI Interoperability protocol (D4.3) submitted 6 months prior to this deliverable.

The Interoperability software in its final version is made public on the SURIMI-Project github account and contains the following three tools and their respective repositories:

Tool	Description	Repository
Controller	Coordinates the execution of simulation modules and manages data exchange.	SURIMI-controller
Output Creator	Processes and prepares simulation outputs.	SURIMI-output-creator
Protocol	Defines communication protocols between simulation modules.	SURIMI-protocol

Technical descriptions of all components are provided in the individual repositories. The README.md files contain general descriptions and user instructions, while detailed technical documentation of each tool is given in <tool name>_architecture.md.
